

GreenPeak Vacancy

GreenPeak is a leader in battery-free communication technology for wireless sense and control applications. Our revolutionary technology utilizes energy-harvesting to facilitate battery-free operation in a totally wireless environment, without the need for either communications or power connectivity.

→ GreenPeak Technologies brings **wireless** and **battery-free** solutions for **sense and control networks** with **high reliability** and **standard compliance**.

To further strengthen our team, we currently have a vacancy for a

Senior RF Design Engineer

Your profile

- ▶ If you have a strong theoretical background and at least 10 years of hands-on experience in RF design, we are interested in talking to you.
- ▶ You should have solid, hands-on experience in RF ASIC blocks, such as VCO, PA, LNA, etc., as well as experience with board layout, matching networks, filters, and antennas - aka. someone who can shift easily between on-chip and off-chip design and understands their possibilities and limitations.
- ▶ You are an innovative and creative thinker who has a good knowledge of state of the art wireless transceiver architectures for CMOS SoC/SiP solutions and who can make trade-offs on system- and circuit level to optimize for power consumption and area.
- ▶ We are looking for someone who can work in CMOS as well as other processes (GaAs, SiGe). Strong experience with low-power, low-leakage design is required.

Our offering

- ▶ Early-adopter job in growing high-tech company: you really make the difference
- ▶ Extremely dynamic working environment: new ideas are born and implemented as fast as you can manage
- ▶ A highly visible internationally oriented position

At GreenPeak, people make the real difference!

If you like to join our young and dynamic team and if you are convinced you will be a real asset to GreenPeak, we would be delighted to receive your CV.

GreenPeak
